- 25. Compile it for production

Nom Prénom:

BOOTSTRAP (20 pts)

26. Edit a bootstrap website:

- Make the last element of the [navbar] a [button] with red borders
 - Replace the entire [hero header] with a 3 slides [carousel] (the content of the hero header can be resumed for the 3 slides)
 - Create a section of text between the carousel] and the [Product Headline]s in this way:
 - The section will have to be contained in a [container]
 - Add a level 1 title (substitute text should be used)
 - Add a level 3 title (substitute text should be used)
 - Add a paragraph (substitution text should be used)
 - All content should be centered
 - Reverse the reading direction of the second [featurette] so that the image is on the right and the text on the left
 - Create a new section that will serve as a price table of this kind:
 - A Level 1 centered title (substitution text should be used)
 - 3 columns of equal widths with:
 - A [card] in which is:
 - A Level 4 title (substitute text should be used)
 - A short paragraph (of the substitute text should be used)
 - A text [Lead] that will be the prize
 - A secondary [button] simulating the referral to the shop
 - The whole text is centered in its column
